DigiFed OC2 Challenge: Build an AIOT System of Systems

Context

- Hight expectation of connectivity and structured information but to acquire information is difficult and associated costs need to be minimized

Challenge

- Today, microcontrollers are evolving fast and become a great platform to collect, process and classify information at low cost but there is not “off the shelf” well industrialized solutions offering a panel of sensing capabilities for the GE Hydro France’s harsh environment.
- Difficulty for GE Hydro France to internalize because of the non-profitable investment

DigiFed OC2 Challenge: Build an AIOT System of Systems

What is GE Hydro France looking for:

- Industrialized solution on a specific use case, chosen by GE Hydro France to accelerate their developments with external skilled resources. Prove that an IIOT family with common features can cover a large type of components and is now profitable and robust enough as smart data collectors.
- The solution has to share data on local brokers, be able to exchange information between nodes and fit in GE ecosystem.
- **GE Hydro France:** "We are thus looking for
 - mature companies, with experience in IIOT / Artificial Intelligence / Tiny ML & Arduino platform
 - with strong knowledge in embedded devices / electronics and libraries building,to help us build a robust Machine Health condition based monitoring solution".

DigiFed OC2 Challenge: Build an AIOT System of Systems

GE Hydro France Selection Criteria:

- Time-to-Market
- Set up time
- Deployment costs
- Solution versatility for our current and future family of assets

GE Hydro France Support:

- Resources and manpower to work with innovators to implement the technology solution
- Mentoring and follow-up
- Access to facilities (GE Hydro France workbench) and knowledge
- Technical reviews and sign off meetings to ensure the implementation phase runs according to plan
- If the pilot project is successful, opportunity to bid to implement the solution on other assets for **GE Hydro France**

Innovation management support

The selected project / 3rd party will receive Innovation Management support :

- To prepare the new product/service go-to-market strategy,
- To get access to further funding or to attract private investors.
