

**Are you a company looking to digitise your products and create market-ready solutions?
We can help!**

DigiFed is an EU funded project that supports companies to innovate and become more competitive by accelerating digital transformation.

Building upon existing Digital Innovation Hubs (DIHs), DigiFed fosters cross-border partnerships between:

- SMEs,
- Midcaps,
- large enterprises,
- Universities,
- Public bodies,
- RTOs.

The partnerships will strengthen a European high-tech ecosystem with Cyber-Physical Systems (CPS) at their centre so that companies and in particular SMEs can benefit from knowledge sharing regardless of their location.

First call for expression of interest to form DigiFed partnerships opens on 17th March and closes on 9th June 2020.

**Digital Innovation Hubs Federation
For Large Scale adoption of digital technologies by European SMEs**

“Digitising Europe's Industry Together”

Funding

Innovative Solutions

Expertise

Advanced Technology

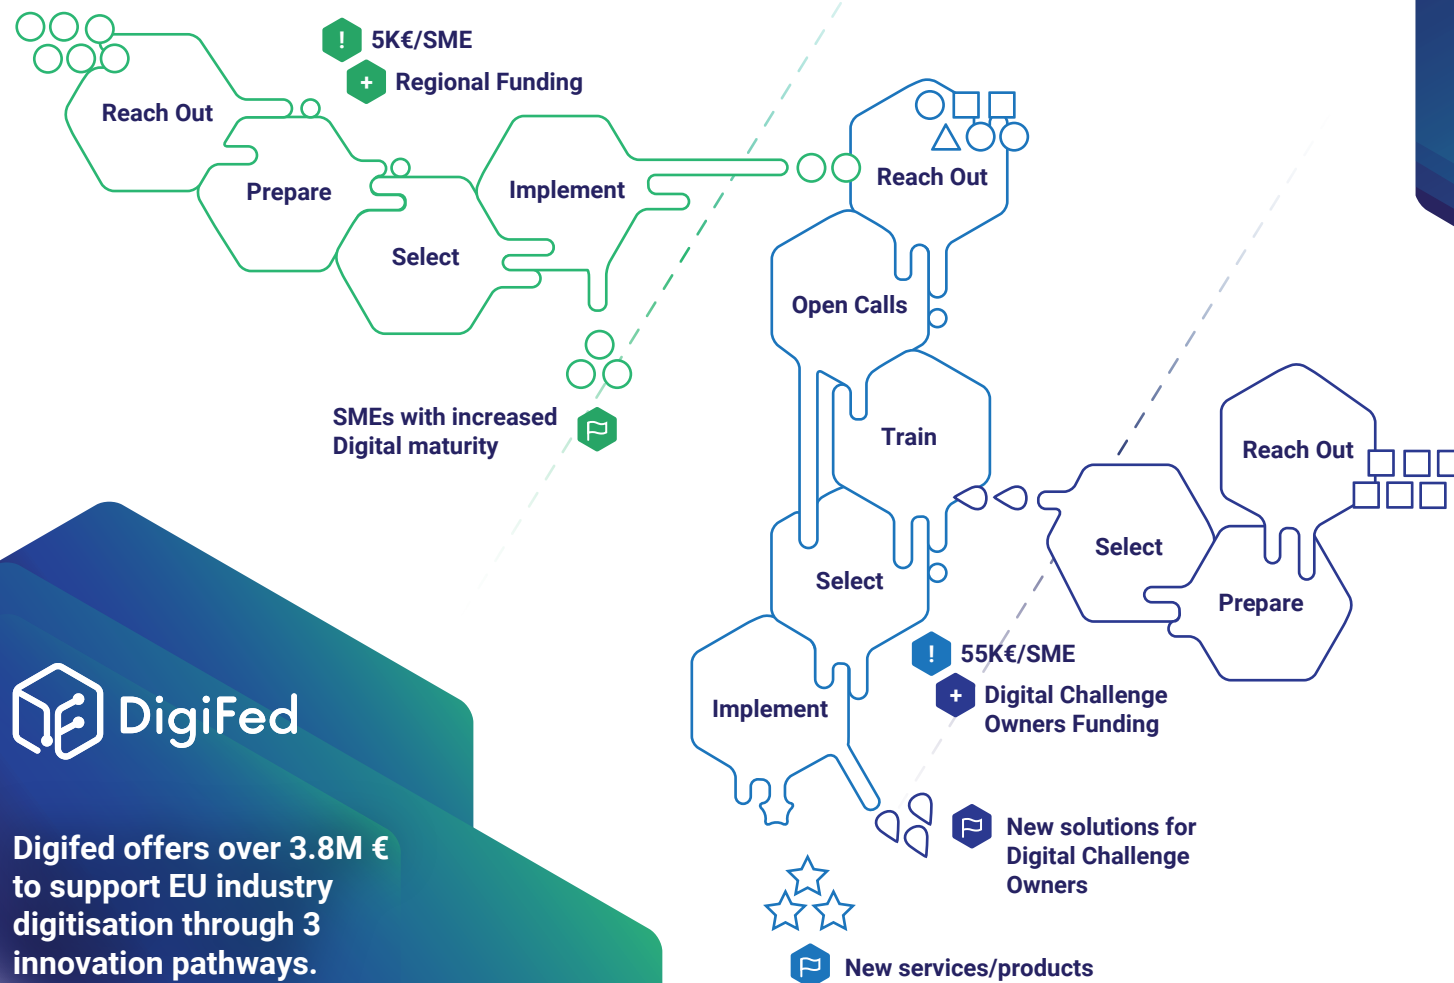

Competencies

Generic Experiments

- **Focus** on raising the digital maturity of groups of SMEs (up to 10) with support from regional funding
- **For** Low- to mid-TRL SMEs, start-ups co-funding their newly digitalised (CPS) product/service.

Application Experiments

- **Focus** on Scale-ups and SMEs that already have clear vision of their digital (CPS) service.
- **For** non digital SMEs / Start-ups; advancing cybersecurity measures in digitalised SMEs; providing expert solutions.

Who should apply for Digifed support?

We are looking for companies that want to:

- Develop novel and innovative smart solutions worthy of market leaders.
- Bridge the physical and virtual worlds with advanced technologies and industrialized solutions.
- Use premium resources and competencies to speed up development.
- Access an unique European ecosystem composed of: leading industrial companies, world-class research organizations, innovation accelerators and private investors.

Digital Challenges

- **Focus** on demand-side innovation where large companies will join forces with SMEs for a digital challenge solution.
- **For** Mid-caps and large companies who can define a challenge and request solutions from SMEs.

Digifed offers over 3.8M € to support EU industry digitisation through 3 innovation pathways.
